I. Company Profile

ABCShop merupakan online shop yang berfokus pada impor barang dari Thailand dan menjual produk tersebut melalui platform e-commerce seperti Shopee, Tokopedia, BukaLapak, Lazada, dan melalui beberapa distributor di Indonesia. Fokus utama dari bisnis ini pada awalnya adalah ikan hidup, makanan ikan dan vitamin ikan. Namun setelah melewati beberapa tahun, fokus dari bisnis ini bertambah menjadi makanan ikan, vitamin ikan, produk kesehatan manusia, sendal, dan sepatu.

II. Company Business Process

2.1 Bisnis Proses Diagram

2.2 Bisnis Proses Dekripsi

1. Supplier

1.1 Sourcing dan Pengadaan

- Pertama-tama, dalam tahap impor, ABCShop melakukan identifikasi produk apa saja yang akan habis dalam waktu dekat, serta melihat produk yang sedang diminati di pasar.
- Sales akan mengirim list pesanan dan melakukan negosiasi mengenai harga dan syarat-syarat pembelian, ini termasuk harga untuk bea cukai, produk, dan ongkos kirim. ABCShop akan menghitung harga barang apakah sesuai atau tidak.
- Apabila harga sesuai, maka invoice akan dibuat untuk produk yang telah dipilih. Setelah administrasi selesai, maka barang pesanan akan dikirim ke pelabuhan

1.2 Pemenuhan Bea Cukai

- ABCShop mematuhi semua regulasi dan persyaratan bea cukai yang berlaku untuk produk impor.
- ABCShop menyiapkan semua dokumen yang diperlukan dan mengurus pemenuhan bea cukai, termasuk pembayaran bea dan pajak yang berlaku.

2. Warehouse

2.1 Penerimaan dan Inspeksi

- Setelah tiba di gudang, barang yang diterima diperiksa untuk menyesuaikan invoice dengan jumlah real nya.
- Catatan inventaris diperbarui sesuai dengan hasil penerimaan.

2.2 Penyimpanan dan Organisasi

- Produk disimpan dengan teratur untuk memudahkan pengambilan.
- Penjual terus memantau produk dan memastikan ketersediaan produk yang cukup.

3. Penjualan

3.1 Penawaran Produk

- Setelah barang-barang impor tersedia di gudang, ABCShop memasukkan informasi produk ke dalam platform e-commerce
- Informasi tersebut meliputi deskripsi produk, harga, gambar, dan stok yang tersedia.

3.2 Manajemen Penjualan

- Penjual memonitor dan mengelola pesanan yang masuk melalui platform e-commerce dan supplier
- Mereka berinteraksi dengan pelanggan, menjawab pertanyaan, memberikan informasi tentang produk, dan memproses pesanan pembelian.

3.3 Pengemasan dan Pengiriman

- Setelah pesanan diterima dan pembayaran divalidasi, produk yang dibeli dipersiapkan untuk dikemas.
- Produk dikemas dengan baik dan aman untuk pengiriman.

4. Manajemen Keuangan

4.1 Pemrosesan Pembayaran

- Setelah penjualan dilakukan, ABSShop memproses pembayaran yang diterima dari platform e-commerce.
- Penjual memantau dan memeriksa transaksi keuangan untuk memastikan akurasi dan mencatatnya kedalam excel

5. Pemasaran dan Promosi

5.1. Strategi Pemasaran Online

III. Problem Statements

3.1 Bukti Dokumentasi

3.2 Deskripsi Problem Statement

1. Sulit untuk mendata dan membuat laporan mengenai laporan keuangan
2. Sulit mencatat produk yang baru datang
3. Sulit untuk mendata customer yang berasal dari beberapa aplikasi
4. Sulit untuk melihat laporan akhir (Banyak produk yang paling laris)
5. Sulit untuk melihat stock terakhir

IV. Database Planning

4.1 Mission Statement & Mission Objectives

Mission Statement

- Aplikasi ini dibuat untuk mempermudah dan mengatasi masalah yang dihadapi oleh ABC Shop, untuk memastikan bahwa data yang diperoleh sudah sesuai dengan keadaan nyata.

Mission Objectives

- Pada tahap ini kami melakukan interview dengan pemilik ABC Shop untuk menanyakan detail dari mission statement.

Hal hal yang kami tekankan adalah

- Bisnis Proses
- Cara Penyimpanan data
- Struktur Bisnis

Missione Objectives ABC Shop :

To maintain (enter, update, and delete) data on MsSupplier

To maintain (enter, update, and delete) data on PurchaseHeader

To maintain (enter, update, and delete) data on PurchaseDetail

To maintain (enter, update, and delete) data on MsProduct

To maintain (enter, update, and delete) data on Batch

To maintain (enter, update, and delete) data on SalesDetail

To maintain (enter, update, and delete) data on SalesHeader

To maintain (enter, update, and delete) data on MsCustomer

To maintain (enter, update, and delete) data on MsCustomerType

To perform searches on MsSupplier

To perform searches on PurchaseHeader

To perform searches on PurchaseDetail

To perform searches on MsProduct

To perform searches on Batch

To perform searches on SalesDetail

To perform searches on SalesHeader

To perform searches on MsCustomer

To perform searches on MsCustomerType

To report on MsSupplier
To report on PurchaseHeader
To report on PurchaseDetail
To report on MsProduct
To report on Batch
To report on SalesDetail
To report on SalesHeader
To report on MsCustomer
To report on MsCustomerType

To track the status of MsSupplier
To track the status of each product
To track the status of purchase

4.2 How data will be collected

- Interviewing and examining documentation

4.3 How format should be specified

- Format File dalam bentuk excel
- Pengiriman File melalui Email

4.4 What necessary documentation will be needed

- Laporan Keluar masuk produk
- Laporan keuangan

4.5 How design and implementation should be proceed

- Mobile Application

V. System Definition

5.1 Scope dan boundaries

- Scope and Boundaries = Customer, Supplier, Warehouse

5.2 View

- Pemilik ABC Shop

VI. Requirement Collection and Analysis

- Centralized

VII. Database Design

7.1 Table Instance Chart

Table Name : Supplier				
Column Name	SupplierID	SupplierName	SupplierAddress	SupplierTelp

7.2 Structural and Procedural Business Rules

Structural

Procedural

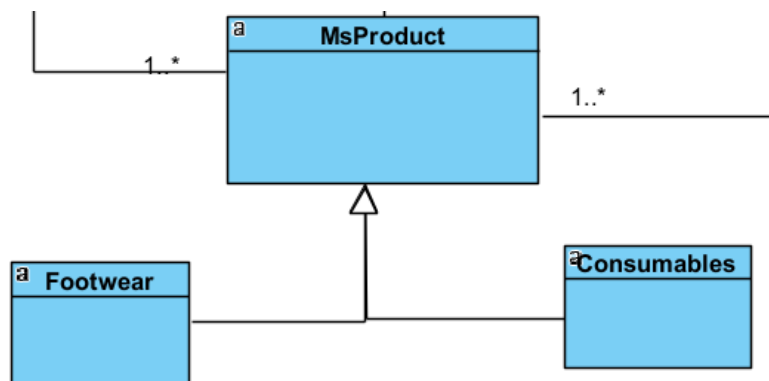

7.3 Identify

7.3.1 Entities & Attributes

ENTITIES	ATTRIBUTES
Supplier	SupplierId(PK) , SupplierName, SupplierAdd, SupplierTelp
Purchase	PurchaseID(PK) , SupplierID(FK), PurchaseDate, KursBaht, TotalPurchaseRp, TotalPurchaseBaht
PurchaseDetail	PDetailID(PK) , PurchaseID(FK), ProductID(FK), Qty, KursBaht, TotalProductPriceRp, TotalProductPriceBaht
Product	ProductID(PK) , ProductTypeID(FK), ProductPriceRp, ProductStock
SalesDetail	SDetailID(PK) , SalesID(FK), ProductID(FK), Qty, TotalSPrice
Sales	SalesID(PK) , CustomerID(FK), SalesDate, TotalSales
Customer	CustomerID(PK) , CustTypeID(FK), CustAdd, CustTelp
CustomerType	CustTypeId(PK) , CustTypeName

7.3.2 Supertypes & Subtypes

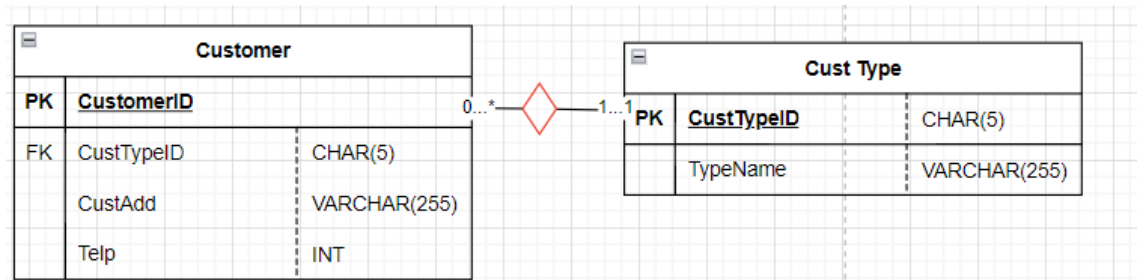

7.4 Relationship

7.4.1 Transferable Relationship

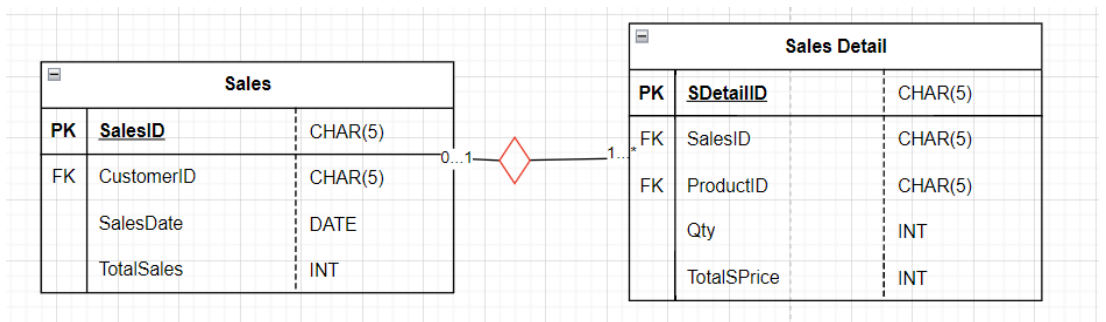

- Tidak ada

7.4.2 Non-transferable Relationship

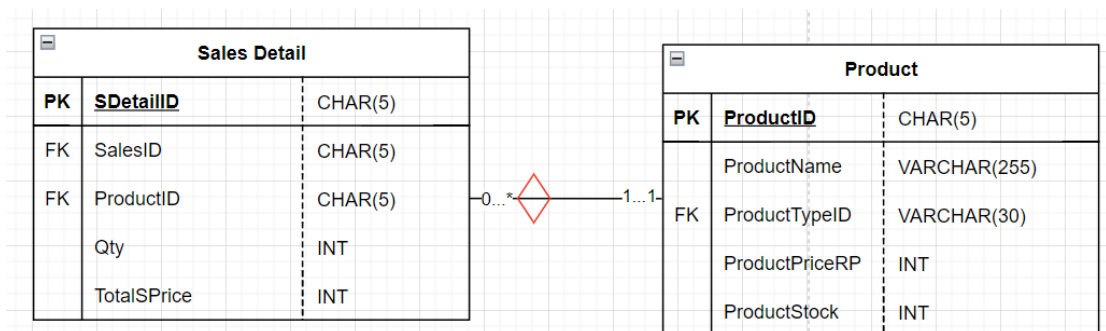

7.4.2.1 Customer - Cust Type

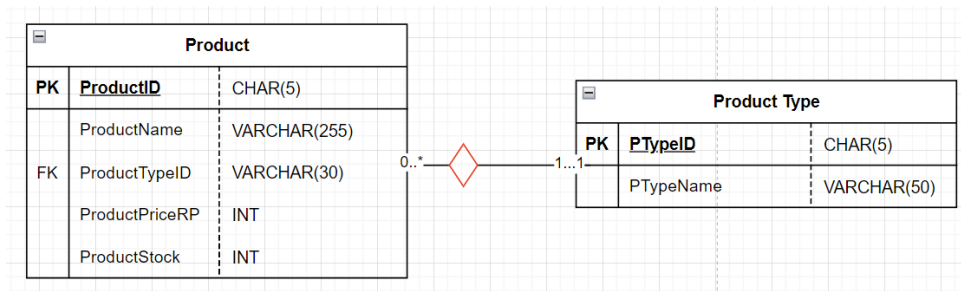

7.4.2.2 Sales - Sales Detail

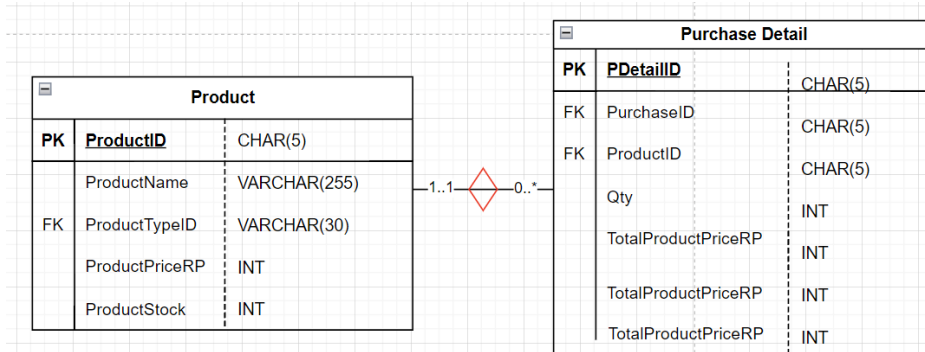

7.4.2.3 Sales Detail - Product

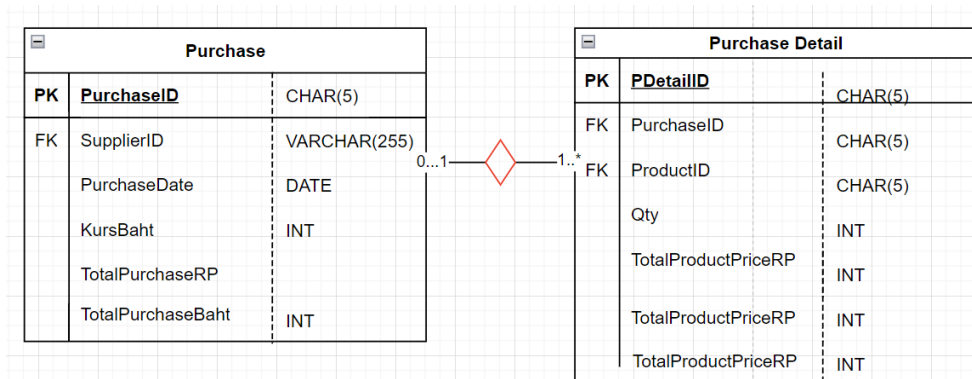

7.4.2.4 Product - product Type

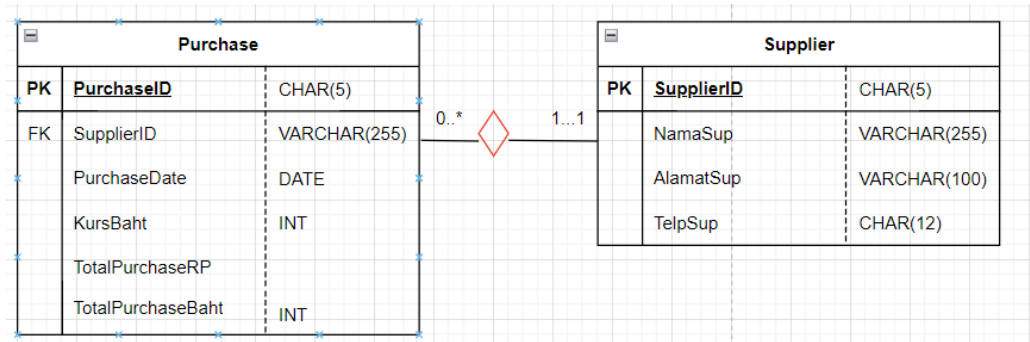

7.4.2.5 Product - Purchase Detail

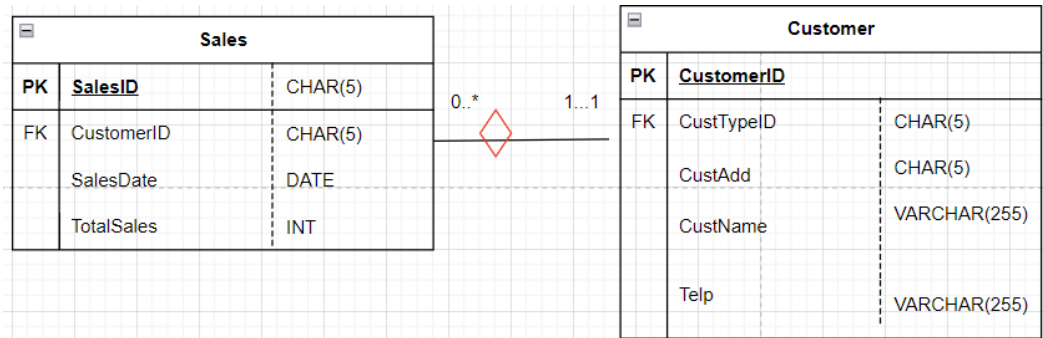

7.4.2.6 Purchase - Purchase Detail

7.4.2.7 Purchase - Supplier

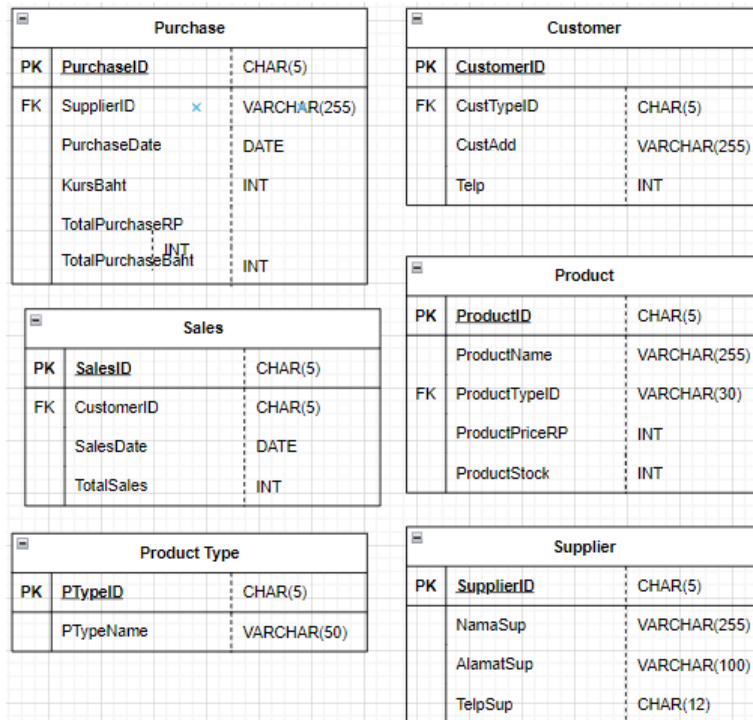

7.4.2.8 Sales - Customer

7.5 UID

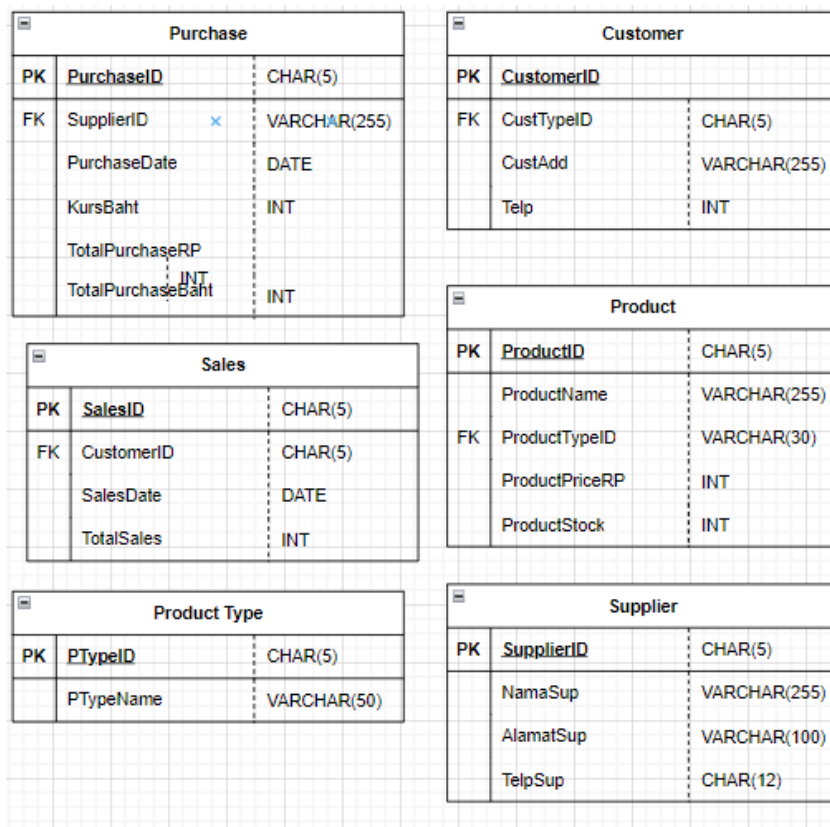

7.5.1 Simple UID

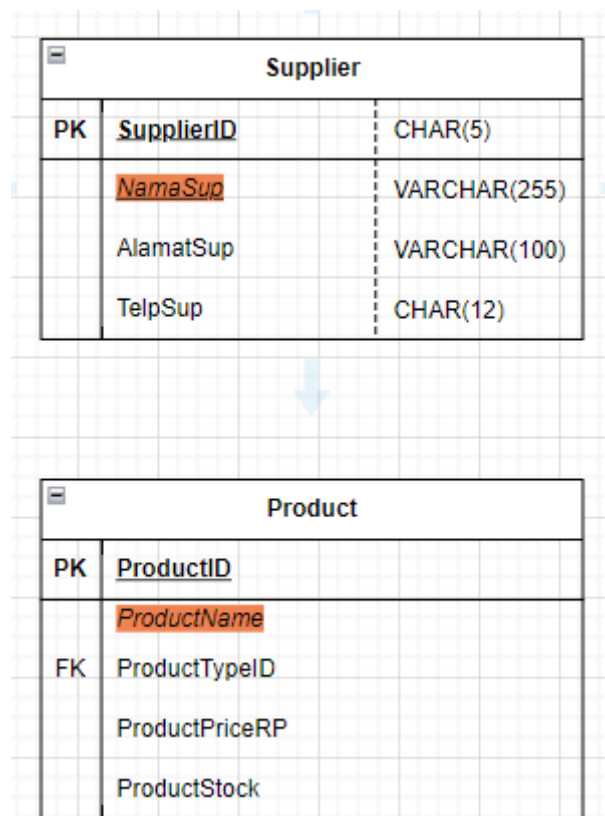

7.5.2 Composite UID

- Tidak ada

7.5.3 Artificial UID

7.5.4 Secondary UID

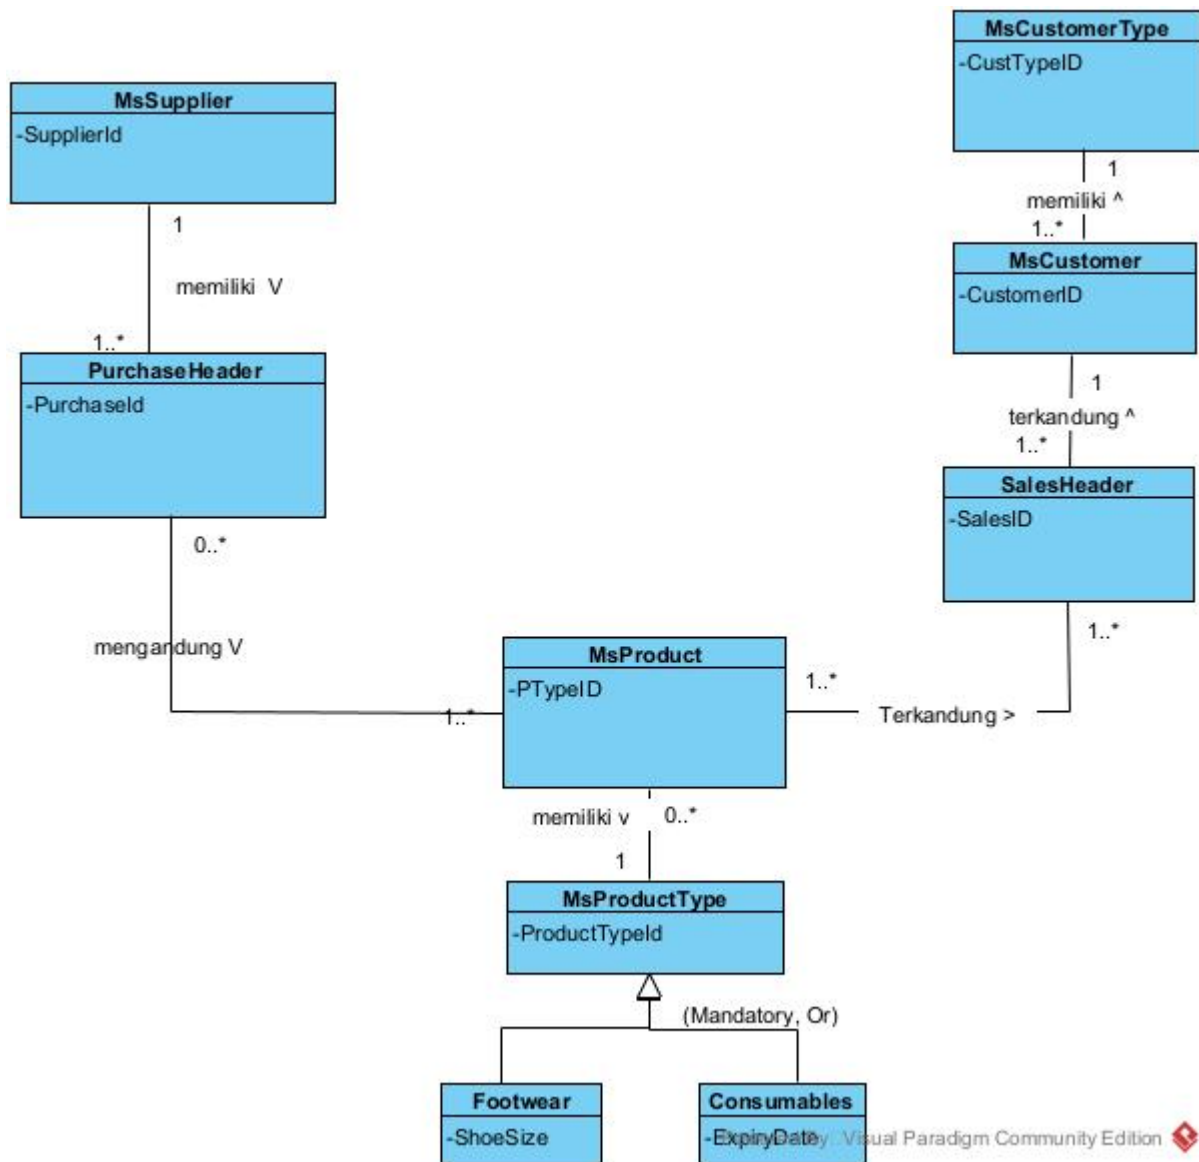

VIII. Conceptual ER Modeling

8.1 Identify entity types

Entity name	Description	Aliases	Occurence
MsSupplier	Entity yang merepresentasikan supplier yang bekerjasama dengan perusahaan ABC	Supplier	<p>MsSupplier memiliki hubungan zero to many terhadap PurchaseHeader karena setiap supplier bisa terdapat di 0 hingga banyak PurchaseHeader</p> <p>PurchaseHeader memiliki hubungan one to one terhadap MsSupplier karena setiap purchase header pasti memiliki 1 dan hanya 1 SupplierID</p>
PurchaseHeader	entity yang merepresentasikan pembelian terhadap supplier yang dijalankan oleh perusahaan ABC	Order	PurchaseHeader memiliki hubungan one to one terhadap MsSupplier karena setiap purchase header pasti memiliki 1 dan hanya 1 SupplierID.
MsProduct	Entity yang merepresentasikan produk yang ada di gudang perusahaan ABC	Storage	MsProduct memiliki hubungan one to one terhadap MsProductType karena setiap ProductID pasti memiliki 1 dan hanya 1 PTypeID.
MsProductType	Entity yang merepresentasikan tipe dari produk yang ada di gudang perusahaan ABC	ProductType	MsProductType memiliki hubungan 1 to many terhadap MsProduct karena setiap PTypeID bisa terdapat di 1 hingga banyak MsProduct.

			MsProduct memiliki hubungan one to one terhadap MsProductType karena setiap ProductID pasti memiliki 1 dan hanya 1 PTypeID.
SalesHeader	entity yang merepresentasikan penjualan terhadap supplier yang dijalankan oleh perusahaan ABC	Sales	SalesHeader memiliki hubungan one to one terhadap MsCustomer karena setiap SalesHeader pasti memiliki 1 dan hanya 1 CustomerID.
MsCustomer	Entity yang merepresentasikan detail pelanggan dari perusahaan ABC	Customer	<p>MsCustomer memiliki hubungan zero to many terhadap SalesHeader karena setiap CustomerID bisa terdapat di 0 hingga banyak SalesHeader.</p> <p>MsCustomer memiliki hubungan one to one terhadap MsCustomerType karena setiap CustomerID pasti memiliki 1 dan hanya 1 CustTypeID.</p>
MsCustomerType	Entity yang merepresentasikan tipe dari setiap customer yang dimiliki oleh perusahaan ABC	CustomerType	MsCustomerType memiliki hubungan zero to many terhadap MsCustomer karena setiap CustTypeID bisa terdapat di 0 hingga banyak CustomerID.

8.2 Identify relationship types

Entity Name	Multiplicity	Relationship	Multiplicity	Entity Name
MsSupplier	1..1	Memiliki	0..*	PurchaseHeader
PurchaseHeader	0..*	Mengandung	1..*	MsProduct
MsProduct	0..*	Memiliki	1..1	Batch
MsProduct	1..*	Terkandung	0..*	SalesHeader
SalesHeader	1..*	Terkandung	1..1	MsCustomer

MsCustomer	0..*	Memiliki	1..1	MsCustomerType
------------	------	----------	------	----------------

8.3 Identify and associate attributes with entity or relationship types

- Digabung di 8.4

8.4 Determine attribute domains

Kelompok 1									
Entity Name	Attributes	Description	Data Type & Length	Nulls	Mult i-Valued	Candidate Key	Primary Key	Alternate Key	Attribute Domain
MsSupplier	SupplierID	Unique, to identify the supplier	5 variable characters	No	No	Yes	Yes	No	SU[0-9][0-9][0-9]
	SupplierName	Supplier's name	255 variable characters	No	No	Yes	No	Yes	Length >1 & Length < 255
	SupplierAddress	Supplier's address	10 variable characters	No	No	No	No	No	Length >1 & Length < 255
	SupplierPhone	Supplier's phone number	13 variable characters	No	Yes	No	No	No	length >10 & length <14
Entity Name	Attributes	Description	Data Type & Length	Nulls	Mult i-Valued	Candidate Key	Primary Key	Alternate Key	Attribute Domain
PurchaseHeader	PurchaseID	Unique, to identify the purchase header	5 variable characters	No	No	Yes	Yes	No	PU[0-9][0-9][0-9]
	TotalPurchaseRp	Total purchase of transaction in	15 variable integers	No	No	No	No	No	Int, length < 15

		Rupiah							
	PurchaseDate	The date of transaction	date	No	No	No	No	No	Date
	TotalPurchaseBaht	Total purchase of transaction in Baht	15 variable integers	No	No	No	No	No	length < 15
	Qty	The quantity of product bought	10 variable integers	No	No	No	No	No	length < 10

Entity Name	Attributes	Description	Data Type & Length	Nulls	Mult i-Valued	Candidate Key	Primary Key	Alternate Key	Attribute Domain
MsProduct	ProductID	Unique, to identify the product	100 variable characters	No	No	Yes	Yes	No	PR[0-9][0-9][0-9]
	ProductName	The product's name	10 variable integers	No	No	Yes	No	Yes	Length >1 & Length < 255
	ProductPriceRp	Product's price in Rupiah	10 variable integers	No	No	No	No	No	length < 15
	ProductPriceBaht	Product's price in Baht	5 variable characters	No	No	No	No	No	Length < 15

Entity Name	Attributes	Description	Data Type & Length	Nulls	Mult i-Val	Candidate	Primary	Alternate Key	Attribute Domain
-------------	------------	-------------	--------------------	-------	------------	-----------	---------	---------------	------------------

					ued	Key	Key		
MsProduct Type	ProductType ID	Unique, to identify the product type	5 variable characters	No	No	Yes	Yes	No	PT[0-9][0-9][0-9]
	ProductType Date	Product type's date	date	No	No	Yes	No	Yes	DATE
Entity Name	Attributes	Description	Data Type & Length	Null s	Mult i-Val ued	Candi date Key	Prima ry Key	Alterna te Key	Attribute Domain
Sales Header	SalesID	Unique, to identify the sales header	5 variable characters	No	No	Yes	Yes	No	SI[0-9][0-9][0-9]
	SalesDate	The date of transaction	date	No	No	No	No	No	DATE
	TotalSales	Total sales of transaction	10 variable integers	No	No	No	No	No	Int, length < 15
	Qty	The quantity of product sold	10 variable integers	No	No	No	No	No	Int, length < 10
Entity Name	Attributes	Description	Data Type & Length	Null s	Mult i-Val ued	Candi date Key	Prima ry Key	Alterna te Key	Attribute Domain
MsCustomer	CustomerID	Unique, to identify the customer	5 variable characters	No	No	Yes	Yes	No	CU[0-9][0-9][0-9]
	CustName	Customer's name	255 variable characters	No	No	Yes	No	Yes	Length >1 & Length < 255
	CustAdd	Customer's address	255 variable characters	No	No	No	No	No	Length >1 & Length < 255
	CustPhone	Customer's phone number	13 variable characters	No	No	No	No	No	length >10 & length <14
Entity Name	Attributes	Description	Data Type & Length	Null s	Mult i-Val ued	Candi date Key	Prima ry Key	Alterna te Key	Attribute Domain
MsCustomer	CustomerTy	Unique, to	5 variable	No	No	Yes	Yes	No	CT[0-9][0-9][0-9]

rType	peID	identify the customer type	characters						
	CustTypeNa me	Customer's type name	255 variable characters	No	No	Yes	No	Yes	Length >1 & Length < 255

8.5 Determine candidate, primary, and alternate key attributes

Entity Name	Candidate Keys	Primary Keys	Alternate Keys
MsSupplier	SupplierID SupplierName	SupplierID	SupplierName
PurchaseHeader	PurchaseID	PurchaseID	-
MsProduct	ProductID ProductName	ProductID	ProductName
Batch	BatchID ProductPrice Qty	BatchID	-
SalesHeader	SalesID	SalesID	-
MsCustomer	CustomerID CustomerName	CustomerID	CustomerName
MsCustomerType	CustTypeID CustTypeName	CustTypeID	CustTypeName

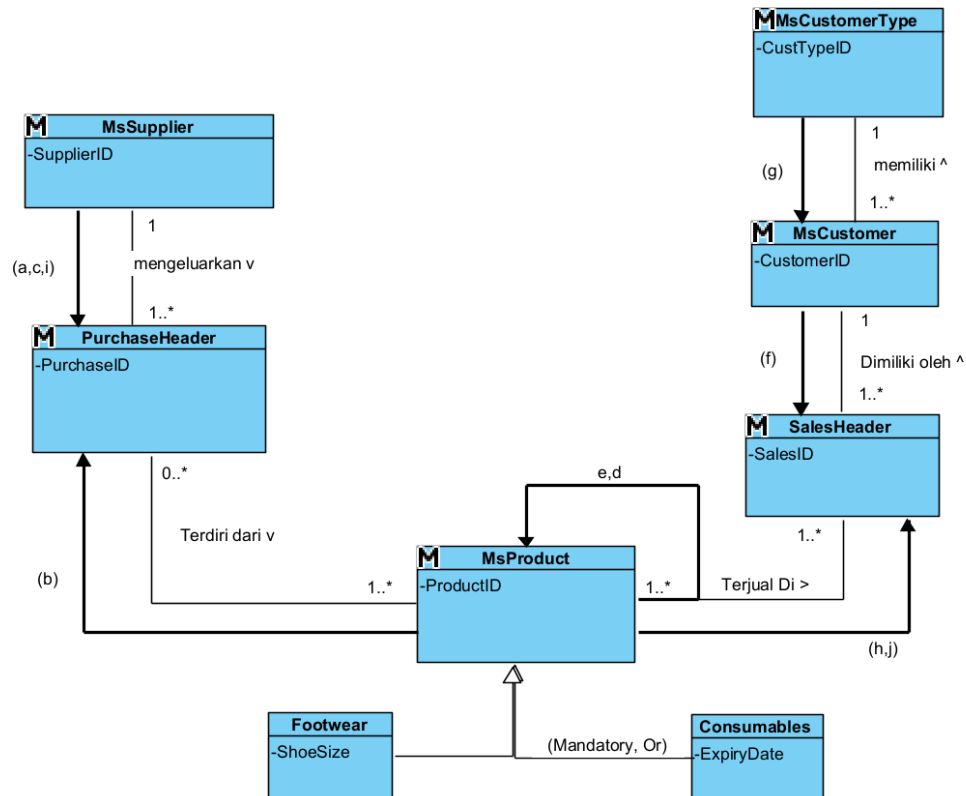

8.6 Consider use of enhanced modeling concepts (optional step)

8.7 Check model for redundancy

- Tidak ada redundancy

8.8 Validate conceptual model against user transactions

- Owner dapat melihat daftar purchase dari setiap supplier
- User dapat melihat produk apa saja di setiap purchase
- melihat jumlah pesanan yang dibeli dari setiap supplier
- User dapat melihat produk apa saja yang ada di setiap product type
- User dapat melihat product type dari produk yang ada
- user dapat melihat customer order di bulan tertentu
- Seller melihat detail customer melalui customer type
- Seller melihat total perhitungan pendapatan dalam kurun waktu tertentu
- User dapat melihat total biaya yang dikeluarkan dari setiap supplier
- User dapat melihat barang terlaris yang telah dibeli

8.9 Review conceptual data model with user

Setelah melakukan interview, pemilik bisnis setuju dengan sistem database dan use case yang dapat dijalankan. Hal ini dikarenakan semua proses bisnis utama yang user butuhkan sudah terpenuhi melalui proses bisnis yang kami gambarkan.

Seluruh kebutuhan yang diinginkan (pencatatan sales, pencatatan purchase, akumulasi pendapatan setiap bulan) sudah terpenuhi melalui proses bisnis tersebut

IX. Logical ER Modeling & Normalization

9.1 Derive relations for logical data model

9.1.1 Strong entity:

1. MsSupplier

- a. SupplierID, SupplierfName, SupplierlName, SupplierPhone
- b. Primary key: SupplierID

2. SalesHeader

- a. Salesid, CustomerID, SalesDate
- b. Primary key: Salesid
- c. Foreign key: CustomerID references MsCustomer(CustomerID)

3. MsCustomer

- a. CustomerID, CustTypeID, CustfName, CustlName, CustStreetname, CustStreetNo, CustKodePos, CustPhone
- b. Primary key: CustomerID
- c. Foreign key: CustTypeID references MsCustomerType(CustTypeID)

4. MsCustomerType

- a. CustTypeID, TypeName
- b. Primary key: CustTypeID

5. Consumables

- a. ConsumablesID, ConsumabkesName, ConsumablesPrice, Qty
- b. Primary Key : ConsumablesID

6. MsSize

- a. Sizeld, FootwearSize
- b. Primary Key : Sizeld

7. FootwareDetail

- a. FootwareID, FootwareName, FootwarePrice
- b. PrimaryK key: FootwareID

8. PurchaseHeader

- a. PurchaseID, SupplierID, PurchaseDate
- b. Primary key: PurchaseID
- c. Foreign key: SupplierID references MsSupplier (SupplierID)

9.2.2 Weak entity:

1. PurchaseDetail_Consumables

- a. PurchaseID, ConsumablesID, consumablesPurchasePrice, Qty
- b. Foreign Key: PurchaseID, ConsumablesID

2. Footwear

- a. SizeId, FootwearID,Qty
- b. Foreign Key: SizeId, FootwearID

3. SalesDetail_Consumables

- a. SalesId,ConsumablesID, ConsumablesSalesPrice, Qty
- b. Foreign Key: SalesId, ConsumablesID

4. SalesDetail_Footwear

- a. SalesId, SizeId, FootwearID, FootwearSalesPrice, Qty
- b. Foreign Key: SalesId, SizeId, FootwearID

5. PurchaseDetail_Footwear

- a. PurchaseID, SizeId, FootwearID, FootwearPurchasePrice, Qty
- b. Foreign Key: PurchaseID, SizeId, FootwearID

9.2 Normalization
